

## Semi- Automatic machine for double loop spiral paper and calendar binding type PZ-5

Both large and small quantities can be bound, as choosing the correct setting is fast and simple. Thanks to the touch screen control panel which displays successive steps of the process, the operator is able to set the machine correctly and very fast. There is no need to change any parts for various settings.

When the machine is in operation, the most important information is presented on the display panel:

- the total quantity to be bound
- the quantity already bound
- the quantity still remaining to be bound
- all the additional information.

You can see how the machine operates on [www.estyma.eu](http://www.estyma.eu)

TECHNICAL DATA				
Binding paper pads	Capacity	up to 1.000 pcs/h	Operating	1 Person
	Paper pad side to be bound	up to 500 mm	Voltage	230 V
	Paper pad side not to be bound	up to 700 mm	Power	1 KW
	Spiral size	from 1/4" to 1 1/4"	Air pressure	6,3 ÷ 10 Bar
Binding calendars with hangers:	Capacity	do 600 pcs/h	Air consumption	0,5 m <sup>3</sup> /h
	Paper pad side to be bound	up to 500 mm	Length	4200 mm
	Paper pad side not to be bound	up to 700 mm	Width	2500 mm
	Hanger length	up to 300 mm	Height	1600 mm
Spiral cut into any lengths	Capacity	do 2000 pcs/h	Weight	300 kg
