

## Perforating machine type MP3-700 MP3-1000

Machine designed to perforate paper and cardboard as well as certain plastics. Maximum perforating length is 700mm for MP3-700 and 1000mm for MP3-1000.

One of the main advantage of of MP3-100 is the possibility to apply two different tools simultaneously, which enables to perform two parallel tasks without the need to change machine settings. Type of perforation depends on the tool applied to the machine.

Standard tools are available on order from our stock. It is also possible to order any tool required – we are ready to design and manufacture it. Standard tools are available on [www.estyma.eu](http://www.estyma.eu)

This perforator, built and tested in our company, is characterised by its high reliability and durability.

Machine operates by either pressing the pedal or automatically by optic sensor.

PERFORATING MACHINE  
TYPE MP3-700 MP3-1000

Built-in cycle counter, controls the number of pads or calendars already perforated.

You can see how the machine operates on [www.estyma.eu](http://www.estyma.eu)

TECHNICAL DATA		
	MP3 - 700	MP3 - 1000
Perforation length	700 mm	1000 mm
Maximum thickness of the perforated paper pad	4 mm	
Recommended thickness of the perforated pad	2,5 mm	
Capacity	Up to 1500 strokes/h (depending on the type of perforated material and operator's proficiency)	
Operating personnel	1 person	
Supply	Voltage	400 V (custom made version 230V also available)
	Power	2,2 kW
Dimensions Width / Height / Length	82 cm / 132 cm / 104 cm	82 cm / 132 cm / 134 cm
Weight	400 kg	450 kg
